

TOOL CRIBS

STTC810/STTC820/STTC840

SECURE STORAGE FOR TOOLS AND SUPPLIES

Making sure tools and supplies are secure is the main purpose of any tool storage structure. Making those structures comfortable and efficient to use is the next step for tool cribs. We work closely with our customers to ensure they get the best solution for their sites.

RUGGED BIGSTEELBOX EXTERIOR

- The BigSteelBox's corten steel shell is durable and secure. Plus, it's easy to move around the job site or around the world
- Sizes range from 10', 20', or 40' long
- Powder coated steel man door(s) with lock box for added security and easy access
- Working cargo doors for ease of moving equipment in and out of storage

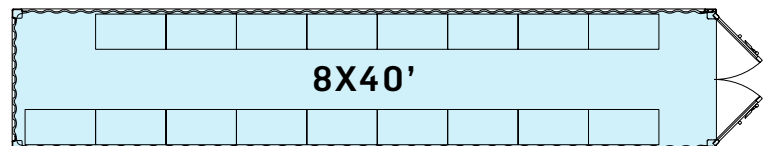

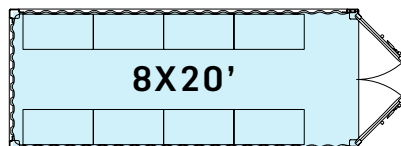

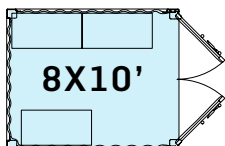

FUNCTIONAL, CUSTOMIZED INTERIOR

- Spray foam insulation to prevent condensation and improve heat retention
- Hard wood bamboo floor is durable and capable of holding heavy equipment
- Fan-forced heater(s) with thermostat to maintain a comfortable working temperature and keep tools & equipment from freezing
- Multiple duplex receptacles to plug in tools, additional lighting, or equipment
- Basket wrapped fluorescent lights to evenly diffuse the light
- Pre-varnished plywood walls for easy tool mounting and 4" rubber baseboards to prevent water from seeping behind the walls
- Either a pigtail extension cord or 100amp panel with breakers & hardwire fitting to provide power to the tool crib

FUNCTIONAL FURNISHINGS

- Tiered shelving to store and organize your tools efficiently
- Work benches for convenience when signing out tools
